

Playing AHA DVDs on DSFS PCs and Laptops

Instructions:

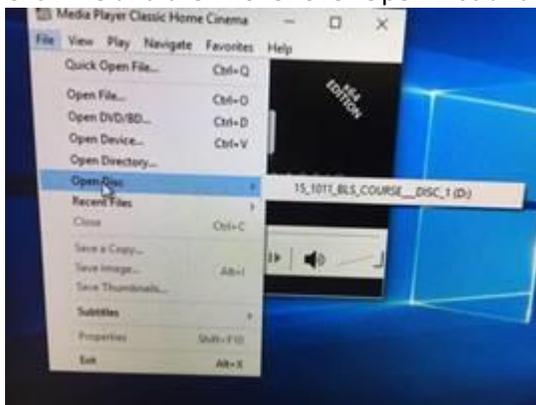

Insert the DVD into the PC and then click on the icon on the desktop named *MPC-HC x64* (shown below).

The player will open

Click File and then hover over Open Disc and then click the *15_1101_BLS_Course__Disc_1 (D)*.

Please do not pause the video. I believe it is something with the security on the DVDs, but it is locking the video causing the need to restart the program and even the PC sometimes.
